Who We Are

Preferred Version LLC is a registered Small Business Administration (SBA) Team of expert IT professionals with over 30 years combined experience helping Federal Agencies such as the DoD as well as large and small organizations solve complex IT problems. Our unique blend of experience and expertise ensures our customers maximize their enterprise IT investment by specializing in:

- **Business Process Management Design and Automation**
- **Enterprise Systems and Integration**
- **Custom Software Development**

All Preferred Version employees are CompTIA Security+ Certified and hold current DoD Security Clearances. We have extensive knowledge applying and adhering to DoD security controls and best practices.

Business Process Management (Workflow Automation)

Preferred Version LLC specializes in the design, development and automation of complex business processes. Our consultants manage the complete end-to-end project lifecycle to turn an idea or existing manual process into an automated solution. We have 18 years of combined experience using the **Oracle Business Process Management Suite (OBPM)** augmented with our custom software development and system integration skills to turn a process idea into an enterprise-class reality.

We manage all phases of our Agile Development Process to achieve automated enterprise-class processes:

1. Requirements Gathering and Documentation
2. Customer Signoff and Iteration Development Plan
3. Software/Process Development and Testing
4. Training and Communication
5. Production Deployment

Enterprise Systems and Integration

We leverage our substantial IT, software development, and consulting experience to help our customers realize the full potential of their IT investments. Preferred Version LLC has installed, configured, maintained and integrated large enterprise COTS and custom software products. Below are just a few examples that highlight the software, technologies and skills we have combined to deliver value to our enterprise customers:

- Oracle Business Process Management Suite
- Portal products such as Oracle Webcenter Interaction, Plumtree
- Oracle Database and Microsoft SQL Server Databases
- Monitoring and tuning performance of large systems.
- Web and Application servers e.g. IIS, Apache, Weblogic, Tomcat
- Identity and Authentication using LDAP, Microsoft Active Directory, Oracle Access Manager, X.509 PKI and CAC related technologies.
- Integration Technologies including SOAP, JMS and Web Services
- Planning and execution of large scale migrations and upgrades.

Custom Software Development

Preferred Version LLC has vast experience developing custom software for standalone applications and enterprise integrations as well as complex internal and external facing web applications. Our consultants have broad knowledge in software development languages and frameworks, application servers, middleware, networks and databases. This background allows us to architect IT solutions that cannot be met by commercial software alone. We choose the best set of technologies to fit the business need rather than forcing the business to fit the technology.

Customer Highlights

United States Department of Defense – Defense Finance and Accounting Services (DFAS)

Preferred Version helped DFAS design and implement dozens of mission-critical business processes throughout the agency. Examples include completely automating Employee Appraisals and Performance Plans, streamlining the Contract Acquisition and IT Purchase Requests processes, automating the Employee Telework approval and reporting process and Ordering and Procurement of Office Supplies. Preferred Version worked with DFAS SME's

during all aspects of the project lifecycle including developing the final production solutions using the **Oracle Business Process Management Suite**.

GTESS Corporation

Preferred Version worked with a health care claim transaction technology provider to use the **Oracle Business Process Management Suite** to completely modernize their aging folder and text-based workflow system. The new system increased productivity and capacity as well as providing a platform for delivering new service and product offerings including a patent-pending Physician and Insured matching technology that reduced the number of claims presented for manual validation by 50%.

Agency for Healthcare Research and Quality (AHRQ)

Preferred Version assisted the agency with planning, strategy and implementation of combining several disparate systems including SalesForce, WCI Portal, Drupal and Atlassian Confluence into one unified enterprise solution. Preferred Version implemented a new single sign-on solution using OpenLDAP, integrated with the enterprise portal, installed and upgraded COTS software and developed and upgraded over 50 java-based web applications.

United States Marine Corps

Preferred Version developed a web application that Marines deployed in Afghanistan and Iraq used to record and analyze location-based intelligence data.
